

NET Phase Two Beeston and Chilwell route

104 & 235

NET works update – Bramcote Lane, the Greenway and Inham Road

As you may be aware, works have been taking place in Beeston and Chilwell as part of the extension of Nottingham's tram network.

As part of these works, from Monday 18th February, water utility diversion works are due to take place on Bramcote Lane at its junction with Sandby Court, for approximately five weeks. These works will follow the current gas works. Temporary traffic lights will be in use at the junction and the nearby bus stop (BR0155) will be temporarily moved a short distance while these works take place.

Water culvert works along the Greenway are due to begin at the end of February. The works should have no impact on traffic or pedestrians. Water culvert works are also due to take place on Bramcote Lane in mid to late spring. We will contact you nearer the time with more details about these works.

Also, from Monday 18th February for approximately two weeks, works to widen Inham Road, near to its junction with Eskdale Drive are due to take place. Temporary traffic lights will be in use while this is being carried out so that works can be completed safely.

The next stage of these works involves installing the tram tracks across this part of Inham Road and along the section of the tramway that will run just to the north of Eskdale Drive. These works will follow the other works, are due to begin on 4th March taking approximately four months to complete, and are expected to be finished in July.

Temporary traffic lights will also be in use while these works are in progress, so that they can be completed safely.

The works will be carried out between 8am – 6pm, Monday – Friday and 8am - 1pm on Saturday and will be in accordance with the Code of Construction Practice (CoCP), which was agreed at the NET Phase Two public inquiry held in 2007.

The CoCP regulates the way that works for NET Phase Two can be undertaken, and sets out standards for our contractor on issues such as controlling noise, vibration and dust. This will ensure that works are undertaken in a responsible and sympathetic manner.

We apologise in advance for any inconvenience that these works may cause you, and would like to assure you that we will do all that we can to keep disruption to a minimum. For more information about these works, the CoCP, or the project in general, please contact us on: (0115) 924 24 54 or visit www.thetram.net/phasetwo.
